1   generating some portion of the video image of a television program in response

2   to said detected and passed data and outputting said generated portion of the video

3   image to said television monitor;

4   inputting a clear-and-continue instruction to said processor in response to some

5   digital data detected in said television signal;

6   causing said processor to clear its generated portion of the video image in

7   response to said instruct-to-clear signal and jump to a predetermined instruction.

IN THE SPECIFICATION

On page 1, please rewrite the paragraph in the "Cross-Reference to Related

Applications" as follows:

This is a continuation of application serial no. 08/113,329, filed August 30, 1993,

herein incorporated by reference in its entirety, which is a continuation of application

serial no. 056,501, filed May 3, 1993, now U.S. Patent 5,335,277, which was a

continuation of application serial no. 849,226, filed March 10, 1992, now U.S. Patent No.

5,233,654, which was a continuation of application serial no. 588,126, filed Sept. 25, 1990,

now U.S. Patent No. 5,109,414, which was a continuation of application serial no.

096,096, filed Sept. 11, 1987, now U.S. Patent No. 4,965,825, which was a continuation-

in-part of application serial no. 829,531, filed Feb. 14, 1986, now U.S. Patent No.

4,704,725, which was a continuation of application serial no. 317,510, filed Nov. 3, 1981,

now U.S. Patent No. 4,694,490.

Respectfully submitted,

Thomas J. Scott, Jr.
